DETAILED ACTION

Claim Objections

1. Claim 27 is objected to because of the following informalities:

Re claim 27, claim line 4: The article -- a -- should be inserted prior to the term "reflecting". Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claim 17, claim line 2: The phrase "said light beam" lacks antecedent basis. The prior claims, specifically claim 14, have only recited a beam.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2856

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 7 and 8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12, 18, and 19 of U.S. Patent No. 6,530,268. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent are narrower in scope than the limitations cited in the application claims. Therefore, the patent claims teach all of the limitations of the application claims plus additional limitations not found in the application claims.

6. Claims 7 and 29-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 16 and 43-46 of U.S. Patent No. 6,612,160. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons:

Claim 15 of the patent is narrower in scope than the limitations cited in application claim 7. Therefore, the patent claim teaches all of the limitations of the application claim plus additional limitations not found in the application claims.

Claims 43-46 of the patent are narrower in scope than the limitations cited in application claims 29-32. Therefore, the patent claims teach all of the limitations of the application claims plus additional limitations not found in the application claims.

Art Unit: 2856

7. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

8. Claims 1-6, 8, 26, and 27 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 10-15, 17, 40, and 41 of prior U.S. Patent No. 6,612,160.

This is a double patenting rejection.

Patent claims 10-15 and 17 correspond to the limitations recited in application claims 1-6 and 8.

Patent claims 40 and 41 correspond to the limitations recited in application claims 26 and 27.

Response to Arguments

9. Applicant's arguments filed 28 August 2005 have been fully considered but they are not persuasive.

With respect to applicant's argument that confusion over the actual inventorship of the invention requires the Office to invoke an interference, the applicant may be correct; however, the applicant needs to follow the guidelines in the MPEP and undertake the necessary steps as they pertain to interference practice before the Office

will invoke an interference. Applicant needs to review MPEP section 2307 and other relevant sections for guidance in molding a case for interference proceedings.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
